

IN THE SPECIFICATION

Please replace the Abstract of Disclosure with the following:

A seal having a resiliently compressible wall and a sheet member attached to and coiled about the wall. The seal may have an extension element extending from the sheet member and attachable to a first surface of a closure, such as a window sill. The seal rolls upon closure of the window, causing the sheet member to either coil or uncoil about the wall, and further causing the seal to compress. The subsequent compression and coiling seals the gap between the window and the window sill with minimum abrasion to the seal.

Please replace the paragraph "CROSS REFERENCE TO RELATED APPLICATIONS" with the following:

This Application is a continuation-in-part of U.S. Utility Patent Application Serial No. 10/050,086, filed January 14, 2002, now abandoned, which is a continuation-in-part of U.S. Utility Patent Application 09/634,050, filed August 08, 2000, now abandoned, which claims benefit of U.S. Utility Patent Application Serial No. 08/910,612, filed August 13, 1997, now abandoned, which claims the benefit of U.S. Provisional Patent Application Serial No. 60/028,742, filed October 22, 1996.
